AB A method of treatment of and compn. for human degenerative neurol.
diseases discloses the administration of therapeutic amts. of an
enhancement agent, such as thrombopoietin, to enhance the repair of
neurons, including re-myelination. A regulatory agent, such as thyroid
hormone or TSH, may also be included as part of the method and compn. as a
regulator of cell division and oligodendroglia prodn. Compns. of the
agents and method of administration, such as orally, i.v., i.m. and
intrathecally are also claimed.
